

Pop Top Treat Can

Tutorial by Fran Sabad

Supplies needed

Snack size pop top can

Safety can opener

Designer Series Paper

Sticky Strip

Crystal Effects

Your choice of embellishments

1. Use the safety can opener to open the **BOTTOM** of the can. Leave the top with the pull tab alone! Rinse the can well and dry.

2. Cut your Designer Series paper to 1 3/4” x 8 1/4” and apply sticky strip to both short ends.

3. Wrap the Designer Series paper around the can .

4. Fill with your choice of treats. Note—it does not have to be candy. You could include any small gift. You can add shred to the can to help the gift from rolling around but remember that you are working from the bottom of the can and you will need to add the gift first and then the shred so that the gift will be at the bottom.

the shred will be on the bottom when opened.

5. Use the Crystal Effect and apply a line around the edge of the lid. Reattach and let dry.

6. Embellish as desired.
