

White Stazon on Photos

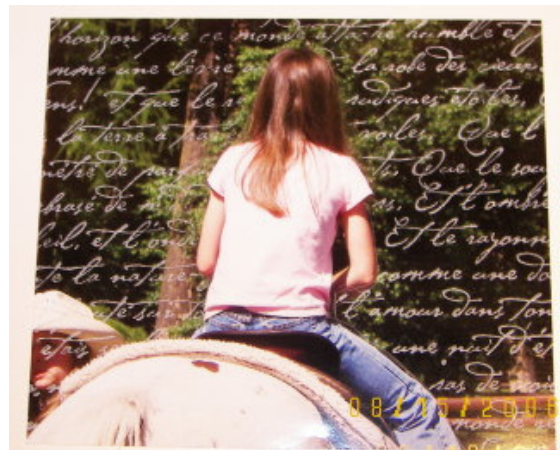

Choose a photograph that has a single, main image or group image.

Trace over the image using vellum and cut out. This makes a mask. Use Dotto or any repositionable adhesive to hold it on the photo. Ink your background stamp with White Stazon and stamp.

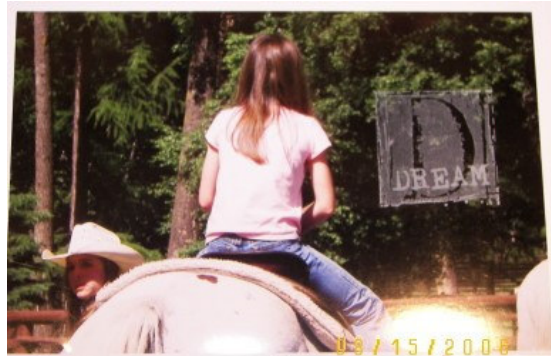

Love this finished look!

You can also:

Stamp an image with White Stazon directly onto the photo

OR

Stamp with White Stazon on a window sheet or transparency and attach it over your photo.
